

HLTAID011 Provide first aid (FA)

TCP TRAINING

Course description

A First Aid course can save lives! Figures show that up to 150,000 lives could be saved each year if there were more people who had completed a First Aid course. Nobody wants to be in a position where they are required to administer First Aid; but sometimes, these situations arise and having the relevant skills can be invaluable.

You may need to do a First Aid course for work purposes, want to learn First Aid techniques for your family, or maybe you just want to develop a new and useful skill. Whatever the reason, a First Aid course could make all the difference when it comes to saving someone's life!

Please note, this information is subject to change (eg. locations and unit of competency). For most relevant information, please visit our website – www.tcptraining.com

Last updated: 04/04/2023
